LAO AGROTECH PUBLIC COMPANY

CONDENSE NOTES TO THE INTERIM FINANCIAL INFORMATION (UN-REVIEWED)
FOR THE THREE-MONTH PERIOD ENDED 30 SEPTEMBER 2019

1 General information

LAO AGROTECH PUBLIC COMPANY (the Company) is a private company incorporated and domiciled in the Lao PDR.

The address of its registered office is wattay noiy thong village, Sikhottabong district, Vientiane, Lao People Democratic Republic.

The principal activity is to carry on the palm oil industry which starting from palm sapling cultivation, palm plantation, palm product processing and sale by the Company itself. The Company also provide the financial supports and palm saplings to the farmer for planting and buyback the palm seed.

In addition, the Company also imported finish goods such cooking oil and coconut drink from Thailand to sale in Lao PDR.

This interim financial information ware authorized for issued by the director on 07 November 2019.

2 Significant accounting policies

The principal accounting policies adopted in the preparation of the financial statements are set out below:

2.1 Basic of preparation

According to the accounting Law No.47/NA date 26 December 2013, non-public interest enterprises should apply Lao Financial Reporting Standards (LFRS) for Non-Public Interest Enterprises. The standards to be applied depend on the entity's size, which could either be large-sized enterprises or small and medium-sized enterprises. LFRS are effective for annual periods beginning one or after 1 January 2017 as announced thru the Ministerial Decision on the Adoption of Financial Reporting Standards for Non-Public Interest Entities No.530/MOF issued on 26 February 2016.

The Ministry of Finance has been lenient towards the enterprises in fully adopting the LFRS during 2017, since 2019 is still a transition period. The tax authority is flexible to maintain prior year practice for tax filing purposes.

2.1 Basic of preparation (Continue)

Accordingly, the Company has maintained and kept its own accounting policies as last year, which can be significantly different from LFRS. These differences may include many areas, such as revenue recognition, property, plant and equipment, income tax, provision for employee benefit and agriculture. Therefore, users of the financial statements should be aware and be able to understand these differences and how these will affect their interpretation of the financial statements and their decision making.

The preparation of financial statements requires management to make estimates and assumptions that affect the reported assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the revenues and expenses in the reported periods. Although these estimates are based on management's knowledge of current event and actions, actual results may materially differ from those estimates.

Gains and losses on exchange resulting from the settlement of foreign currency transactions and from the translation of monetary assets and liabilities denominated in foreign currencies are recognized in the statement of income.

2.2 Foreign currency translation

Transactions denominated in currencies other than Lao Kip (LAK) are translated into LAK at the rates of exchange prevailing on the transaction dates.

Monetary assets and liabilities at the statement of financial position date denominated in currencies other than Lao Kip are translation into Lao Kip at the exchange rate prevailing at the statement of financial position date.

2.3 Trade and other receivable

Trade and other receivables are carried at original invoice amount and subsequently measured at the remaining amount less allowance for receivables impairment based on a review of all outstanding amounts at the year end, except receivable from contract farming. The amount of the allowance is the difference between the carrying amount of the receivable and the amount expected to be collectible. Bad debts are written off during the year in which they are identified and recognized in the statement of income within selling and administrative expenses.

2.4 Inventories

Inventories are stated at the lower of cost or net realizable value. Cost is determined by actual average cost of production incurred in each production year using first in-first out (FIFO) method. The cost of finished goods comprises with direct raw material, direct labour cost and other direct production overheads. The cost of purchase comprises both the purchases price and costs directly attributable to the acquisition of the inventory, such as import duties and transportation charges, less all attributable discounts, allowances or rebates. Net realizable value is the estimate of the selling expenses. Allowance is made, where necessary, for obsolete, slow-moving and defective inventories.

2.5 Factory supplies

Factory supplies are stated at the cost and determined by weighted average cost method. The costs of purchase comprises both the purchase price and costs directly attributable to the acquisition of the supplies, such as import duties and transportation charges, less all attributable discounts, allowances or rebates. Allowance is made, where necessary, for obsolete, slow-moving and defective items.

2.6 Property, Plant and Equipment

Property and equipment are stated at historical cost less accumulated depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the plant and equipment items. Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of item can be measured reliably.

Land is not depreciated. Depreciation on other assets is calculated so as to write off the cost less residual value of each item of plant and equipment on a straight-line basis over their expected useful life.

2.6 Property, Plant and Equipment (Continue)

The estimated useful life for each category of property and equipment is as follows :

	Years
Buildings and infrastructure	5-40
Furniture and equipment	3-5
Machinery and equipment	5-20
Vehicles	3-5

Where the carrying amount of an asset is greater than its estimated recoverable amount, it is written down immediately to its recoverable amount.

Repairs and maintenance are charged to the statement of income during the financial period in which they are incurred. The cost of major renovations is included in the carrying amount of the asset when it is probable that future economic benefits in excess of the originally assessed standard of performance of the existing asset will flow to the Company. Major renovations are depreciated over the remaining useful life of the related asset.

Gains and losses on disposal are determined by comparing proceeds with carrying amount and are included in the statement of income.

2.7 Deferred plantation costs – Palms

Deferred plantation cost – palms is an accumulated cost of palm plantation which covers cost of land clearance, fertilizer, labor and other expenses which are directly related. All are measured at cost less accumulated amortization and allowance for impairment. Palms, which are ready for harvested (generally 4 years from planting), will be amortized to be cost of raw materials over the period 26 years of its expected economic useful life.

2.8 Deferred plantation costs – Saplings

Deferred plantation cost – Saplings is presented in the statement of financial position at cost deducted accumulated allowance for impairment. The costs comprise both direct purchase price of sapling and costs directly attributable to the acquisition of the palm saplings such as import duties and transportation charges.

2.9 Revenue recognition

Revenue from sales of goods are recognized when significant risks and rewards of ownership of the goods are transferred to the buyer which is generally at the time that the Company delivers products to its customers based on agreed trading and delivery terms and conditions.

Revenue from providing services are recognized when services have been rendered, which is generally upon acceptance of delivery.

Other revenue are recognized on the following basis:

- Revenue from sales of palm residue is recognized when palm residue is transfer to buyer based on agreed trading and delivery terms

2.10 Income tax

Income tax represents profit tax (corporate income tax) for the year concerned as determined in accordance with the Lao Tax Law.

3 Financial risk management

3.1 Financial risk factors

The Company's activities expose it to a variety of financial risk such the effects of foreign currency exchange rates, credit risk and liquidity risk. Management focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the financial performance of the Company.

3.1.1 Foreign exchange risk

The Company mainly purchase from suppliers in foreign countries and is exposed to foreign exchange risk arising from various currency exposures primarily with respect to Thai Bath and the US Dollar (USD). As at 30 September 2019, management did not use any financial instrument since it considers that the anticipated cost using financial instruments would exceed the foreseeable benefits.

3.1.2 Credit risk

The Company has no significant concentrations of credit risk as sales are normally made in short credit terms with various number and types of retail customers and thus credit risk is diversified. Cash and bank transactions are only made with high credit quality financial institutions.

3.1.3 Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash to support ongoing business and future investment for expansion. Management maintains its broad cash forecasts to aid in cash and liquidity management and ensure it has sufficient cash to meet short term operation needs and long-term investment plans.

4 Capital risk management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern from the ongoing project on hand in order to provide reasonable returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure to facilitate its operation and investment plan, the Company may borrow new funds from shareholders and lenders, issue new shares and adjust the amount of dividends paid to shareholders in the future.
